

Solar cables | Photovoltaic cables

Solar H1Z2Z2-K (max. 1,5/1,5 kV DC)

Single-core flexible cable is suitable for photovoltaic and solar systems with cross-linked polymer insulation and halogen-free outer sheath. Expected period of use under normal conditions is at least 25 years. The cable is suitable for the interconnection of the various elements of photovoltaic systems, suitable for fixed installations outdoors and indoors, also suitable for direct ground laying (the installation specifications need to be considered).

Technical attributes

- fire behaviour - Dca
- halogen-free
- low smoke emission
- ozone-resistant
- UV-resistant
- flame-retardant
- temperature-resistant
- weather-resistant
- TÜV and VDE acc. to EN 50618

We like to help and provide
LIGHT in the darkness

böhm Kabel promotes and supports the solar project **IMAGINE LIGHT of LOVE FOR LIFE** in Costa Rica.

Single-core flexible cable is suitable for photovoltaic and solar systems with cross-linked polymer insulation and halogen-free outer sheath. Expected period of use under normal conditions is at least 25 years. The cable is suitable for the interconnection of the various elements of photovoltaic systems, suitable for fixed installations outdoors and indoors, also suitable for direct ground laying (the rodent resistance can be optimized by using protective tubes).
